NOI 2020 C++ Basics Course Assignments

Assignment 4

Upto note 7

Do the following tasks in the same code

Task 1

Create the following string and store it in a variable named myFirstString.
"User's name is : "

Task 2

Read a string from the user and get his/her first name.

Task 3

Add the name of the user to the end of the above created string and print the new string.

Task 4

 Get a position of the created string from the user and replace the character at that position with an empty space. Display the updated string.
